Re: Weekly Erosion Control Report (Weeks 16-18)
129 Parker Street, Maynard, MA

Dear Maynard Conservation Commission:

Goddard Consulting, LLC is pleased to submit this site inspection and erosion control report on behalf of Capital Group Properties in accordance with the approved SWPPP (EPA Tracking MAR12AI87) and the Maynard Stormwater Bylaw Permit.

SITE VISITS: Goddard inspected the site weekly between the past several weeks in the course of routine site inspections and/or after measurable storm events such as the one we had on 8/10/13. Due to few rain events and vacation schedules, we did not provide weekly reports in this period. At no time during any rain event did erosion occur in the downgradient receiving stream. The measures outlined in the SWPPP have been implemented including the riser pipes at select catch basins. Goddard believes the site is in reasonable compliance with the SWPPP.

GENERAL SITE ACTIVITIES: Another post-demolition sweep is scheduled.

EROSION SPECIFIC ACTIVITIES: The following activities were performed:

- Hand picking of remaining insulation pellets.

IMMEDIATE ACTION ITEMS NEEDED:

- None.

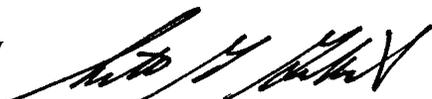

LONG-TERM ACTION ITEMS NEEDED:

- Parking lot shall be inspected and swept quarterly or as needed post demolition given no traffic is expected at the property.

If there are any questions concerning this submission, please do not hesitate to contact us.

Sincerely,
Goddard Consulting, LLC
