Re: Weekly Erosion Control Report (Weeks 26-30)  
129 Parker Street, Maynard, MA

Dear Maynard Conservation Commission:

Goddard Consulting, LLC is pleased to submit this site inspection and erosion control report on behalf of Capital Group Properties in accordance with the approved SWPPP (EPA Tracking MAR12AI87) and the Maynard Stormwater Bylaw Permit.

**SITE VISITS:** Goddard inspected the site weekly over the past several weeks in the course of routine site inspections and/or after measurable storm events. At no time during any rain event did erosion occur in the downgradient receiving stream. The measures outlined in the SWPPP have been implemented. Goddard believes the site is in full compliance with the SWPPP.

The Maynard Conservation Commission has agreed to perform a joint site inspection in order to evaluate reducing significantly the need for frequent site reviews. No outstanding problematic issues were identified at the site walk. The site is largely inactive and stable. Thus, in accordance with the SWPPP, site inspections will be immediately reduced to once every 2 weeks.

**EROSION SPECIFIC ACTIVITIES:** The following activities were performed:

- None

**IMMEDIATE ACTION ITEMS NEEDED:**

- None

**LONG-TERM ACTION ITEMS NEEDED:**

- Parking lot shall be inspected and swept as needed post demolition given little to no traffic is expected at the property.
- Inspections are being reduced to once every 2 weeks.

If there are any questions concerning this submission, please do not hesitate to contact us.

Sincerely,  
Goddard Consulting, LLC

by

Scott G Goddard, PWS  
Professional Wetland Scientist
