Hi Stuart,
No conservation or stormwater concerns.
Thanks,

Julia Flanary, AICP

Subject: RE: High School solar

Good Morning Julia,
Just to follow up on Bill's email. The solar canopy array consist of 3'x6' panels. There is approximately a 1" gap on all sides of each panel which allows stormwater to fall through. So the solar panel act similar to a leaf. It intercepts rain but allows it to fall in the general vicinity it would normally.

Please let me know if you have any questions.
Regards,

Hi Julia,

We are meeting today on site with the solar panel team at the high school. I'm just making sure there were no comments regarding conservation concerns for the solar panels. The team says there will be no increased runoff water system impact.

I want to ensure that we can get one hearing possible. please confirm.

Thanks,

Bill
