TOWN OF MAYNARD

RULES AND REGULATIONS

BOARD OF HEALTH

REGULATION TO ENSURE THE SANITARY AND SAFE OPERATION OF FOOD ESTABLISHMENTS

AUTHORITY

This regulation is adopted by the Maynard Board of Health under the provisions of Massachusetts General Laws, Chapter 111, Section 31 and 127A in the exercise of its power to protect the health and welfare of the public.

PURPOSE

The Maynard Board of Health recognizes that a comprehensive food protection program is supported by a partnership effort between industry and food regulatory officials. Together, educated food handlers and effective inspection programs can reduce the incidence of high-risk practices which can lead to foodborne disease.

Other benefits of food manager training include providing industry with a more professional approach to food safety, improving communication between industry and regulators, increasing consumer confidence in their food supply and avoiding negative economic impacts often associated with foodborne disease. Food establishments which have trained food handlers are also more likely to be in compliance resulting in less inspection and enforcement time spent by the Board of Health.

Food manager certification requirements will ensure that managers have knowledge of the principles and practices of food sanitation with the primary purpose of preventing foodborne illness and protecting the public health in accordance with Chapter X of the State Sanitary Code, 105 CMR 590.000, Minimum Sanitation Standards for Food Establishments.

According to Injury Facts 2017, choking is the fourth leading cause of unintentional injury death. Training to respond to choking incidents will further the protection of public health and welfare.

Accordingly, the Board of Health declares that the purpose of this regulation is to require that Food Establishments’ operations are safe and sanitary and that training requirements proactively protect consumers from choking and other hazards, thereby protecting the public health and welfare.
