Note: Scheduled start times are approximate, with the exception of public hearings.

- I.** Call Board of Health Meeting to order
- II.** COVID-19 Update
- III.** PFAS and EEE Overview – Select Board requested that the Board of Health look into the pesticide spraying of Avid 10+10 and its impact both on the prevention of EEE and the impact of PFAS concentrations that could negatively impact our drinking water. At this time Maynard’s PFAS levels are not a major cause of concern, however our neighboring communities are dealing with water that has levels above the recommended threshold. EEE was a major concern in 2019 in the state and we were a high risk community for several months. The deadline to opt out of spraying has passed but the Select Board would like the BOH to research this issue, hear from subject matter experts and make a recommendation regarding our participation in the state pesticide program going forward.
- IV.** Approve meeting minutes of previous meeting
- V. Adjournment**
